

MICRO-CHE™

Soil Micronutrients

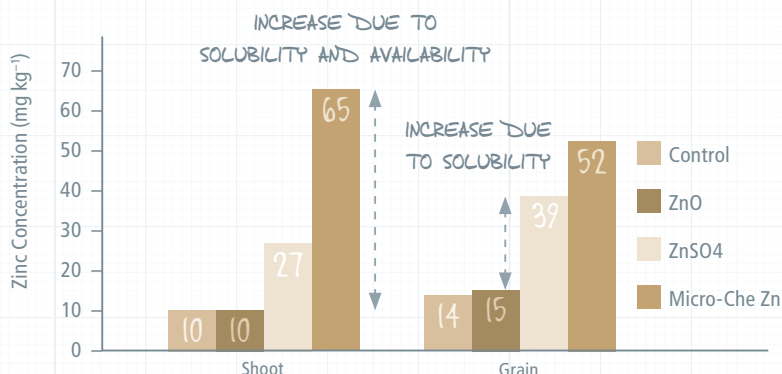

For Nutrition that's Available— add Micro-Che to your Soil.

Micro-Che™ is a high quality chelated line of micronutrients designed for soil application.

- Chelation protects the nutrient from being tied up in the soil and allows for it to be ready available to the plant.
- Improved nutrient use efficiency.
- Compatible with Arise, Blocker, Transit-S, UAN, 10-34-0 and ATS*.
- Plant available and seedling safe.

Proven Agronomic Performance

- By improving solubility and availability of micronutrients, Micro-Che increased overall zinc concentration by an average 65% in wheat shoots.
- Due to improved solubility of micronutrients, Micro-Che increased overall zinc concentration by an average 37% in wheat grains.

Cevizcioglu and Cakmak, HarvestZinc, 2013.
Wheat Growth Chamber Trials.
Zinc applied at 1 lb/ac equivalent.

Product Recommendations

- Apply Micro-Che with your liquid in-furrow or starter fertilizers.
- Please conduct a soil sample to determine if your soil will be responsive to a liquid micronutrient application and assist in determining the rate required to be applied.
- *Micro-Che Zn, Micro-Che Mn, Micro-Che B are compatible with ATS. Please note, Micro-Che Cu is not compatible with ATS.
- To view the Micro-Che SDS and Product Label and to read more information, please visit www.atpnutrition.ca

Product	Analysis	Rate (L/ac)	Timing	Form
Zinc	9.0Zn-7N, 40.6%EDTA	0.5-1 L/ac	Soil	Liquid
Copper	7.5Cu-7N, 34.5%EDTA	0.5-1 L/ac	Soil	Liquid
Manganese	6.0Mn-3N, 35.0%EDTA	0.5-1 L/ac	Soil	Liquid
Boron**	10.0B-4N	1.0-2.0 L/ac	Soil	Liquid

**Boron is a complexed boric acid formulation

At ATP, we believe a proactive, science-based and balanced nutrient plan is the single most effective way to deliver the genetic potential of the crop. We challenge the status quo to drive productivity. At ATP Nutrition, we believe in Powering Growth with Science®.
